SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL
Frameworks & Libraries: React, Next.js, React Native, Expo, Node.js, TailwindCSS
Tools & Cloud Infrastructure: REST APIs, GraphQL, Docker, GitHub Actions, Bash, PostgreSQL, Pandas, NumPy, Appium

EXPERIENCE

- Wealthsimple**
Software Developer

May 2026 - Present
Toronto, ON

 - Built **12+ reusable TypeScript** and **React Native** components to streamline complex multi-asset trading flows
 - Modernized an internal engineering tool by unlocking **20+ GraphQL endpoints** and migrated **3 legacy REST APIs**
 - Optimized CI/CD workflows to cut build times by **3 minutes (20% reduction)** by eliminating mock environments
- Rakuten Kobo**
Quality Assurance Automation Engineer

Sep 2024 - Aug 2025
Toronto, ON

 - Engineered a **React Native** reader app with **Kotlin** and **Objective-C** modules to optimize image rendering
 - Built and integrated **3 CI/CD pipelines** in **GitHub Actions**, reducing manual regression testing time by **40%**
 - Built a **TypeScript MCP server** leveraging **Claude AI** to stream real-time automation coverage metrics into CI/CD
 - Boosted automated test coverage **50%** on iOS/Android apps using **TypeScript** and **Appium**, developing **300+ tests**
- CIBC**
Cloud Technical Analyst

May 2024 - Aug 2024
Toronto, ON

 - Ranked in the **top 10% of 400+ interns**; selected to pitch legacy modernization strategies to senior executives
 - Developed security-hardened internal web apps optimized to load under **500ms** on restricted corporate networks
 - Collaborated with third-party vendors to audit, patch, and secure critical internal portals across **200+ remote sites**
- Pantree**
Software Developer

Sep 2023 - Apr 2024
Kingston, ON

 - Led 4 developers to build a **React TypeScript** Chrome extension, and managed end-to-end delivery for **30+ users**
 - Improved reliability by adding **Jest unit tests** and automated deployment via **GitHub Actions CI/CD** pipelines
 - Boosted user retention by **20%** through **Twilio SMS** notifications integrations and custom in-extension analytics

PROJECTS

- NBA General Manager AI Agent** | *Python, LangGraph, Llama 3.1, RAG, ChromaDB*

github.com/yves-a/LeGM

 - Streamlined multi-team trade evaluations by engineering a **LangGraph** and **Llama 3.1** multi-agent architecture; integrated **ChromaDB** RAG to validate complex offers against CBA salary rules with 98% compliance accuracy
 - Eliminated subjective trade bias by constructing an automated valuation engine utilizing **logarithmic decay** models for player assets, rendering instant, data-driven trade recommendations via a **Streamlit** UI
- AI Powered Resume Analyzer** | *Next.js, Java, Python, TypeScript, Docker, Qwen2.5*

github.com/yves-a/simple-ats

 - Maximized job application success rates by building a semantic analysis pipeline; engineered a **Java** backend and **Python** AI service using **sentence-transformers** to bridge the gap between profiles and job descriptions
 - Accelerated candidate interview readiness by embedding an interactive career coaching engine powered by **Qwen2.5**, delivering real-time, personalized feedback on technical skill gaps via a **Next.js** and **TypeScript** interface

EDUCATION

- Queen's University**
Bachelor of Computer Science (Honours)

May 2026

 - GPA:** 4.13/4.3
 - Awards:** 4x Dean's Honour List, Principal's Scholarship (\$5,000, Top 5% of incoming class)
